RG400 Speed Gate

TECHNICAL SPECIFICATION

Material

Cabinet: AISI#304
Top: AISI#304/Plexiglass
Obstacle: Plexiglass/Tempered glass
Internal metalwork: Galvanized iron

Operating parameters

Power: AC110V-220V 150W
Operating temperature: 0~60℃
Environment: Internal
Operating humidity: 0~95% (No condensation)
Storage temperature: -5~50℃
Run voltage: DC24V
Operating power: Standby5W Usually45W Peak60W
Average life span: Not less than 5000000 cycles
Number of sensors (standard): 8
Passage speed: 30-40 person / per minute
Passage width: 550mm
